

Hey Dan... Your Boat Stinks!

Here's what new boat owner
Dan Lundstrom has to say about SteraMist™:

"When I purchased this boat, it smelled strongly of diesel fuel, chemicals, mold and mildew. We tried everything including hiring cleaners, applying various chemicals and wiping down every inch of this boat. After spending thousands of dollars, we still had a serious problem. But after SteraMist™? Wow! I can't believe the difference in how my boat smells. I was so close to completely gutting my boat or selling it because of the odor. I'm really happy that I can finally enjoy my investment"

Does your boat have odors from: Mold, Mildew, Diesel Fuel or Other Odors?

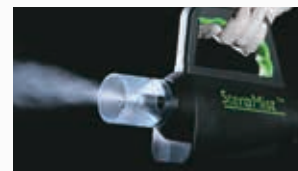

Regency DKI is a Primary Service
Provider of SteraMist™

STERAMIST™
POWERED BY BINARY IONIZATION TECHNOLOGY™

Now you can rid your boat of odors once and for all with SteraMist™! Powered by Binary Ionization Technology®, SteraMist™ is the only transportable system that has a proven disinfection efficacy against mold and mildew, along with the accompanying odors, on contact.

Why SteraMist™?

- Fully portable, fast-acting, hand-held, point-and-spray disinfection system.
- Reaches surfaces that regular disinfectants can't.
- Single applicator surface unit enables disinfection of all surfaces – including high touch, sensitive equipment and electronics.
- Does not contaminate the environment with any toxic by-products.
- Needs no wipe, no rinse and leaves no residues.
- Can be easily incorporated into current cleaning procedures and protocols.
- Does not require heating, ventilation, or air conditioning systems to be off.

SERVICE SPECIAL! **STERAMIST™**
